Subject index

A

AaH II toxin 361
ACE inhibitors 342
Acetazolamide 519
Acetylcholine 72, 127, 255, 651
– receptor 150. 701
Action potential 566, 678
Activation 701
– -inactivation kinetics 658
Active Na transport 88
Adenosine 56, 127
Adenylate cyclase 372, 384
Adrenal medulla 95
Adrenalectomized rats 191
β-Adrenergic agonists 142
– transmission 56
α_1-Adrenoceptors 575
β-Adrenoceptors 276
Adrenomedullary chromaffin cells 95
Afterhyperpolarization 762
Aging 642
– rat 642
Airway cells 172
– epithelium 540
Albumin extravasation 507
Aldosterone 156
Allopurinol 127
Alpha motoneurones 762
Amanita toxins 342
Amiloride 121, 156, 241, 540, 617
– -blockable Na^+/H^+-exchange 183
– -insensitive conductance 156
4-Aminopyridine 244, 425, 575, 678
AMP 1
–, dbc 37
Angiotensin 342
– II 230
– – analogues 230
Anion channel 37
Antiarrhythmic drug 693
Antidiuretic hormone 707
Apamin 63
Apical K^+ channels 115
Arachidonic acid metabolism 611
Area CA 1 588
Arginine vasopressin 707
Articular nociception 330
ATP 387, 414, 651
– inhibition 449
ATPase 204
– activity 554, 741
ATP-depletion 47
– -K^+ channels 479
– -regulated K^+ channel 414
– -sensitive K^+ channel 387
– -sensitive K-channels 47
– -sensitive K^+ channels 250
Atrial cells 651
– myocytes 63
– natriuretic factor 507
– – peptide 336
Axonal conduction velocity 762

B

Ba ions 88
Ba^{2+} 1, 449, 582
– -sensitive K^+ channels 444
Baclofen 95, 471
Ba-currents 504
Balanus eburneus 395
Barium 718
Baroreceptor 713, 774
Basolateral cell membrane 726
– membrane 624
BAY K 8644 444, 504
Bethanechol 72
Bicarbonate reabsorption 533
Bicuculline 95
Blood flow 355, 594
Blood-gas partition coefficient 214
Body weight gain 747
Bovine atrial cells 651
Bradykinin 330, 540
8-Bromo-cyclic AMP 104
Brown adipose tissue 747
Brush border membrane 461
– – membrane vesicles 165

C

Ca, intracellular 395
Ca channel 504
– channel antagonist 678
– concentration 310
– – at nerve terminals 299
– current 384, 526, 658
– entry 526
– theory of facilitation 310
Ca^{2+} 1, 566, 582
Ca^{2+}-activated K^+ channels 444
Ca^{2+}-activated K^+ channels 671
Ca^{2+}-activated K^+ current 63
Ca^{2+} and cholinergic effects 533
Ca-channels 638
Ca^{2+} chelator 461
Ca^{2+} current 1
Ca^{2+}-current 276
Ca^{2+} dependence 617
Ca^{2+}-dependent K^+ channels 262
Ca^{2+}-dependent K^+ current 425
Ca^{2+} fluxes, smooth muscle 230
Ca^{2+} inflow 566
Ca^{2+}-release 276
Ca^{2+} sensitivity 741
Cable analysis 718
Caffeine 63, 136, 688
Calcium 304, 444, 664, 701
– antagonists 664, 751
– ATPase 433
– buffering system 425
– channel 547
– channels 255, 582
– concentration 588
– current 566, 701, 767
– dependence of release 289
– fluxes 230
– homeostasis 734
– influx 533
– ions 136
– release 688
– – channels 645
Calmodulin 372
– antagonist 533
– antagonists 372
cAMP 1, 29, 414, 701, 767
– dependent pathway 88
– level 540
– -dependent protein kinase 701
Capillary density in muscle 355
– growth 355
Captopril 342
Carbachol 53329,
Carbonic anhydrase 519
Cardiac hypertrophy 209
– muscle 12, 355, 645, 741
– myocytes 247, 276, 384
Cardiac Purkinje fibre 269
– – fibres 88
Cardiomyocytes 701, 767
Cardioplegic solution HTK 269
Cardiorespiratory responses 351
Ca-sensitivity 209
Catecholamine secretion 95
Cation channels 617
– permselectivity 630
– -permselective pathway 630
Cd^{2+} 566
Cell culture 172, 617
– membrane potential 183
– – resistance 718
– – resistance 156
– motility 490
– pH 726
– swelling 624
– volume 381
Central chemoreceptors 519
– β-adrenoceptors 142
Cerebral arteries 250
– circulation 250
Channel blockage 671
– gating system 244
– open probability 449
Chemodenervated cats 519
Chloride channel(s) 37, 172
– conductance 316
– current 104
– secretion 37, 611
– transport 540
– /bicarbonate exchange 726
Cholecystokinin 29
Cholesterol 262
Choline 449
Cholinergic agonists 72
– effect 533
– receptor 533
Choroid plexus 37
Chromaffin cells 95
Circuit analysis 121
Cl^- conductance 29
Cl^- permeability 29
Cl^-/anion exchanger 29
Cl^- conductance 611
Cl^-/HCO_3^- exchange 726
Cloned β-cell line HIT T15 47
Closed state 693
Co^{2+}-sensitive outward current 63
Cold-induced thermogenesis 747
Collecting cells of rat kidney 191
Colon 155, 678
Concentric contractions 351

Contractile proteins 136
– speed 762
Contraction 484, 664
Coronary dilatation 127
– heart disease 209
– system 127
Cultured myotubes 150
– renal tubular cells 183
Current-voltage relation 756
Cyclic AMP 104, 276, 461
Cyclooxygenase 611
Cysteamine 606
Cystic fibrosis 104, 172
– – patients 540
– fibrosis-sensitive Cl channels 104
Cytosolic Ca^{2+} 449
– calcium 191
– pH 449

D

Dentate gyrus 588
Depolarization 244, 304, 310
– dependence 299
Desensitization 230, 701
Desynchronized sleep 142
Developing soleus muscle 204
Development 204
3,4-diaminopyridine 566
Diazoxide 47
DIDS 29
Diet-induced thermogenesis 747
Diffusional water permeability 630
Diltiazem 449
Dimethyl sulfoxide 395
Diphenylamine-2-carboxylate (DPC) 611
Diphosphorylation 484
Distal renal tubule 241
DMPP 72
DMSO 395
DNA transfection 198
Dog ventricular fibres 244
Dorsal ganglia 22
Dual-pipette technique 701, 767

E

Ear artery 56
Eccentric contractions 351
Edge leaks in Ussing chambers 235
Electrical field inhomogeneity 235
Electroretinogram 494
Enalapril 342
Endothelial mechanisms 127
Endothelin-induced augmentation 526
End-plates 566, 582
Enhanced 701, 767
Epicardial deformation 220
Epinephrine 384
Epithelia 156
Epithelial cells 104
– impedance 718
– transport 121
Epithelium 37
European Union of Societies of Experimental Biology (EUSEB) 777
Everted tubule 115
Excitability characteristics 642
Excitatory junction potential 56
Exercise 407
– responses 351
Expiratory neurons 72
Extracellular pH 22, 519
– volume 598

F

Facilitation 299, 566
–, twin pulse 310, 304
Fatigue calcium 734
Federation of European Physiological Societies (FEPS) 777
Fetal nasal epithelium 617
Fever 606
– response 440
Filtration area 598
Fluid exchange, multiple 241
Food intake 747
Forskolin 104, 276, 322, 540
Frank-Starling mechanism 741
Functional border zone (heart muscle) 220
Fura-2 191, 734
Furosemide 37

G

GABAb-activated K^+ conductance 471
$GABA_A$ receptors 95
Gallbladder 444
– epithelium 718
Gap junction channels 12
Gas exchange models 214
Gating modifier 671
"Gating" phenomenon 316
Gene transfer by lipofection 198
Geneticin 198
GFR 751
Glia 22
Glibenclamide 47, 414
Glomerular blood flow 501
– dynamics 501
– haemodynamics 751
– tuft 598
Glucagon 707
Glucose uptake 165
G-proteins 255
GTP 701, 767
Guanosine-triphosphate (GTP)-binding protein 471

H

Haemorrhage 774
Heart cell 124
– – membrane 387
– valve disease 209
Henles loop 449, 707
Heptanol 12
High-intensity exercise 407
Hippocampal neurons 255, 497
– slices 471, 588
Hippocampus 756
Histamine 484, 540
Human atria 209
– nerve cells 701
– skeletal muscle 399
– sodium channels 693
Hydraulic pressure 624
Hydronephrotic kidney 774
Hydroxyl radical 127
5-Hydroxy-triptamine 471
25-Hydroxy-vitamin D_3 372
Hypertrophy, cardiac 209
Hypochlorite 127
Hypothalamic neurones 479
Hypothalamus 606
Hypotonic shock 381

I

IBMX 37
Impalement artifacts 121
Impedance analysis technique 718
Inactivation 1, 693
– of sodium current 399
Indomethacin 648
Inert gases 214
Insulin 494
Intercellular communication 183
Interferon 150, 606
Interleukin-1 440
Internal dialysis 701, 767
Intracellular ATP 414
– Ca^{2+} 395
– calcium 734
– cAMP 414
– Cl^- activity 726
– K activity 269
– Na activity 269
– pH 183
– potentials 121
– recordings 479
Intracerebroventricular injection 440
Ion channels 664
Ion-channel interaction 638
Ionic substitution 688
Ionophore A-23187 533
Isolated perfused kidney 713
– – tubule 449
– single muscle fibres 734
Isoprenaline 88
Isoprenaline-induced current 384
Isoproterenol 142, 540

J

Joint afferents 330
– pain 330
Juxtaglomerular apparatus 774

K

Kainic acid 471
K antagonists 678
K conductance 81
K^+ channel 322, 414, 449
K-channel 47
K^+ channel blockers 449
K^+ channel(s) 22, 479
K^+ conductance 471
K^+ current(s) 22, 387, 425
K^+-conductance 183
KCl-cotransport 37
Kidney 707
–, ANP 336
– cell(s) 381, 461
– K channel 449
– proximal tubule cells 624
– water transport 630
Kinase A 461
Kinase C 461

K^+ channel 624
K^+ channels 250

L

La^{3+} 582
Leak resistance 156
Leaky epithelium 37
Lidocaine 449
Lipid bilayer 645
Lithium ion 384
Locus coeruleus 142
L-type Ca-channel(s) 504, 638
Lung- and airway tissue 214
Lung model 214
Lysophosphatidylcholine 124

M

Macula densa 774
Magnesium 588
Malnutrition 440
Mechanical activity 526
– relaxation 554
Mechanosensitivity 330
Medullary ECF pH and P_{CO_2} 519
Membrane 693
– capacitance 642
– cholesterol 262
– current 81, 381, 384, 678
– fluidity 262
– ionic conductances 642
– patches 247, 497
– potential 37, 269, 316, 381, 624, 664, 701, 767
– reconstitution 645
– vesicles 165
Mesangial cell contraction 598
Mesenteric artery 56
Mesotubarium 664
Mevinolin 262
Microcirculation 501
Microelectrodes 37
Microperfusion 241
Micropuncture 336
Microspheres 594
Mitochondrial respiration 407
Mitral valve disease 209
Mono-phosphorylation 484
Morphometry 598
Motion transducer 490
Motor nerve terminals 81, 310
Muscarinic activation 255
– receptor 651
– receptors 72
Muscle 204, 299, 289
– acetylcholine receptor-channel 150
– blocks facilitation 566
– chloride 316
– during fatigue 734
– fibre(s) 150, 554
– unit contractile speed 762
Myocardial blood flow 220
– function 220
Myocardial ischemia 220
Myocardium 127
Myocytes 1, 276, 414, 387, 547
Myoepithelial cells 774
Myofibrillar ATPase 741
– bundles 554
Myosin light chain phosphorylation 484
Myotubes 150

N

Na channel properties 361
Na permeability 526
Na reabsorption kidney 648
Na transport 88
Na^+/H^+ exchange 461
Na-Ca exchange 269
Na/Ca exchangers 191
Na^+ channel(s) 322, 399
Na-glucose cotransport 118
Na^+/H^+-exchange 183
Na^+/phosphate co-transport 461
Na-K pump 269
Na-K pump activity 494
Na-K-ATPase 648
Nasal epithelium 617
– epithelium 540
Nasal polyp cell culture 172
Na^+ sensitive microelectrodes 88
Negative work 351
Neomycin 198
Nephron 707
Nephron, everted 115
Nephron of hamsters 630
Nephrotoxicity 342
Nerve 322
– cells 693
– terminal 289, 566, 582
Neuromuscular junction 310
Nicotinic acetylcholine receptor 701
– receptor(s) 72, 95, 150
Nifedipine 444, 678
Nodes of Ranvier 81, 322
Non-selective cation channels 617
Noradrenaline 56
Nystatin 336

O

Open state 693
Ophidian kidney preparation 501
Organic anion transport 342
Osmotic water permeability 630
Osteoblasts 104
Ouabain 494
– sensitive QO_2 336
Outward current, transient 244
Oxytocin 121

P

PAH transporter II 342
Pancreatic β-cell(s) 47, 504
– zymogen granules 29
Papain 497
Paracellular shunt resistance 156
Parachloromercuribenzene sulfonate 630
Parathyroid hormone 104, 372, 461, 707
Patch-clamp 37, 63, 115, 150, 172, 247, 262, 449, 547, 556, 617, 624, 658, 671
– technique 22, 47, 95, 104, 124, 387, 399, 414, 497
Perchlorate 688
Pertussis toxin-sensitive G-protein 255
PGE_2 648
pH 22
Phase-switching 72
Phasic transmitter release 566
Phenylephrine 575
Pheochromocytoma cells (PC12) 425
Phloridizin 118
Phobol esters 461
Phosphaturia 372
Phosphodiesterase activity 1
Photodiode 490
Photoreceptor 395
pH-regulation 115
pH-sensitive K^+ channel 22
Pial arteries in situ 250
Picrotoxin 95
Pinacidil 250, 387
Pinacidil-induced current 414
Polymyxin B 671
Polyribocytidylic acid 606
Polyriboinosinic acid 606
Pontine reticular formation 142
Portal vein 526
Postnatal rats 756
Potassium 588, 664
– channel 651
– conductance 269
– transport 115
Potential difference oscillations 444
Prazosin 355
Pre-synaptic current components 566
Presynaptic currents 81
Progesterone 747
Propanidid 95
Propranolol 142
Prostaglandin E_2 330
Protein kinase 701
Protein kinase C 575
Protein-calorie malnourished rabbits 440
Proximal convoluted tubule 533
– tubule 342
Pulsatile perfusion 713
Purinergic receptor 651
Purkinje fibres 88
Pyramidal neurones 756
Pyrogen 440

Q

Q_{10} 638
Quantal release 289
– transmitter release 299
Quiet-wakefulness 594
Quinidine 449
Quinine 63, 449
Quisqualate acid 471

R

Ramipril 342
Rate of force generation 484
RBC velocity measurements 501
^{86}Rb-efflux 47
$^{86}Rb^+$ efflux 664
Rectifying K^+ channels 651
Reinnervation 355
Relaxation 554
REM sleep 142
Renal acidification 115
– actions of 25(OH) vitamin D_3 372
– artery stenosis 713
– blood flow 751
– circulation 501
– glomerulus 598
– organic anion transport 342
– proximal tubule 726
– tubular cells 183

X

Renin release 713
– synthesis 774
Renovascular hypertension 713
Respiration-related neurons 72
Respiratory capacity 407
– epithelia 172
Retina 494
R_β-neurons 72
RU5135 95
Ryanodine 63

S

Sarcoplasmic reticulum 276, 433, 645
– – function 63
Schwann cells, cultured 22
α-Scorpion toxin 361
Second messenger 395
Secretagogue 29
Secretion 29
Secretory epithelial cells 198
Sensitization 330
Sensory neurones 658
Short circuit current 118
Shortening velocity 209
Single channel recording 497
– smooth muscle cells 678
– ventricular myocytes 547
SITS 37
Skeletal muscle 136, 355, 361, 399, 407, 433, 642, 645, 671, 688, 734
Skinned fibres 209. 688
– muscle fibres 136, 554, 741
Sleep 594
– regulation 142
Slow myosin 204
Small intestine 165
Smooth muscle 230, 262, 484, 526, 664
– – cell(s) 56, 638
Sodium absorption 444
Sodium channel(s) 124, 399, 497, 693, 756
– coupled glucose uptake 165
– current 247
– depletion 774
– fluxes 230
– transport 156
Sodium-calcium exchange current 247
– -glucose co-transporter 165
Somatostatin 606
Spinal cord 762
Splanchnic blood flow 594
Steady-state inactivation 756
Stretch 741
Stretch-activated K^+ channel 624
Structure activity relationship 342
Sulphonylurea 47
Superoxide 127
Synaptic inhibition 471
– release 299
– release at nerve terminals 304
– transmission 588
– transmitter release 289

T

Tachyphylaxis 230
TEA 63
Temperature dependence 638
– sensitivity 658
Tension 204
– activation 688
– transient 554
Tetanic relaxation 433
12-0-Tetradecanoyl phorbol-13-acetate 29
Tetraethylammonium 425, 449, 566, 678
Tetrodotoxin 566, 678
Theophylline 37
Thermogenesis 747
Thoracic artery 484
Thrombin 547
Thyroid deficiency 440
– hormone 433
Thyrotoxic skeletal muscle 433
Tight junction conductance 718
– – resistance 718
Tissue metabolites 407
Tocainide 693
Tolbutamide 47, 250
TPA 29
Tracer gases 214
Trachael epithelium 118, 611
Transcellular pathway 156
Transepithelial resistance measurements 235
– voltage 707
Transient inward current 276
Transmitter quanta 304
– release 566, 582
Transverse tubular membranes 688
Trifluoperazine 372
TTX 1
T-type Ca-channel 504
Tubular cells 342
Tubule sodium reabsorption 336
– suspension 336
Twin-pulse facilitation 304, 310

U

Uric acid as radical scavenger 127
Urinary bladder 121

V

Vascular receptor 774
– smooth muscle 230, 262
Vascular tone 713
Vasoconstriction 526
Ventilation 351, 519
Ventricle 741
Ventricular cells 384, 547, 575
– muscle 244
– myocytes 1, 387, 414
Ventromedial hypothalamic nucleus 479
Verapamil 449, 751
Visual cell 494
Voltage clamp(s) 88, 276, 316, 425
– – method 384
– – technique 322
– dependence 617
– -clamped cardiomyocytes 701, 767
Volume depletion 598
– expansion 598
– regulation 37, 381

W

Water reabsorption 336
– transport 630
Whole-cell recording 693
Whole-cell voltage-clamp 701, 767

X

Xanthine oxidase 127
Xenobiotic transformation 342

Z

Zinc 165, 582
Zn^{2+} 582
